About ESMS 9
Welcome

Dear colleagues,

It is a great pleasure to welcome you to the first ESMS Mohs Surgery Course in Zürich. The course is co-hosted by the working group for Dermatosurgery of the Swiss Society of Dermatology and Venerology (SSDV / SGDV).

Whilst different techniques of Micrographic Surgery are practiced in many parts of Europe, Mohs Surgery is still not as widely used in this part of the world as it would deserve to be. The advantages it offers with lowest recurrence rates and best cosmetic outcomes due to minimal excision defects should be available to all patients with skin cancer. The most important aspects in performing good Mohs surgery are solid training under supervision of a Mohs trainer and experience. With this course, we hope to be able to create some interest for the Mohs technique amongst dermatologists and help you to get started with the training or improve your technique if you are already performing Mohs.

The course programme will include extensive coverage of different Mohs techniques, laboratory techniques, indications and reconstruction techniques. Furthermore, there will be several practical sessions, including live surgery demonstrations and group work with microscopy sessions, lab demonstrations and small group discussions about operative techniques.

We hope you will enjoy the course and your time in Zürich.

Best regards,

On behalf of the ESMS Board,

PD Dr. Severin Läuchli
President of ESMS

The executive board of ESMS

General information

Course venue
University Hospital Zürich,
Gloriastasse 31
CH-8091 Zürich
Switzerland

Course language
The course will be held in English.

Certificate of attendance
Certificates of attendance and accreditation will be available from Saturday 26 November, 11 am at the registration desk.

Wifi
Domain: Unispital Public
User name: usz
Password: master
(and confirm afterwards)

Course dinner
The course dinner will be held at the Restaurant Kantorei on 25 November 2016 at 19.30 pm.
A 3 course dinner will be served, including welcome drink and beverages.

The price for the dinner is € 80. This is not included in the registration fee. If you wish to book this, please come by the registration desk.

Address:
Restaurant Kantorei
Neumarkt 2
8001 Zürich

About ESMS

The European Society for Micrographic Surgery is a group of European-based dermatologists dedicated to setting and maintaining professional standards in micrographic surgery for skin cancer, particularly the Mohs technique. There are various forms of micrographic surgery but Mohs surgery is proven to be the most effective and advanced treatment for skin cancer today. It offers the highest potential for cure - even if the skin cancer has previously been treated by another method.

The ESMS is a Sister Society of the EADV, its scientific programme has been incorporated at the EADV-meetings.

Today the ESMS has members from over 25 European Countries and beyond.

Become a member

Membership of the ESMS is open to everyone who is either actively working within the field of micrographic surgery or who, for other reasons, has an interest in the field. There are three different membership categories: Certified member, Associate member and Lab Technician member.

Certified members: All specialists in Dermatology actively performing micrographic surgery according to the standards set by the association are eligible to become certified members. Find more information about the criteria on the ESMS website.

Associate members: Physicians with an interest in micrographic surgery can become associate members.

Lab Technician members: Lab technicians who already perform frozen Mohs sections or have an interest in performing frozen Mohs sections are welcome to become LT member.
